

Text-Based Primary Care: When and Where It's Needed.

The healthcare environment is fast-paced. Whether your employees are on the front lines, involved in the next novel drug discovery or supplying essential equipment, they may find it challenging to take time to care for themselves.

Their care. Their way.

Technology has simplified every aspect of modern life—why not one of the most important: your employees' health? Now they can get the care they need as quickly as everything else, on-demand through the convenience of an app, anytime and from anywhere.

With our easy-to-use technology, our physicians are just a text-message away—available 24/7 from anywhere in the U.S. And they're able to diagnose and treat more than 400 common and chronic conditions, order labs and send prescriptions directly to the local pharmacy.

98point6 is always within reach.

No waiting, no appointments

Private, in-app messaging

Empathetic, quality care

Board-certified physicians are partners in sickness and health

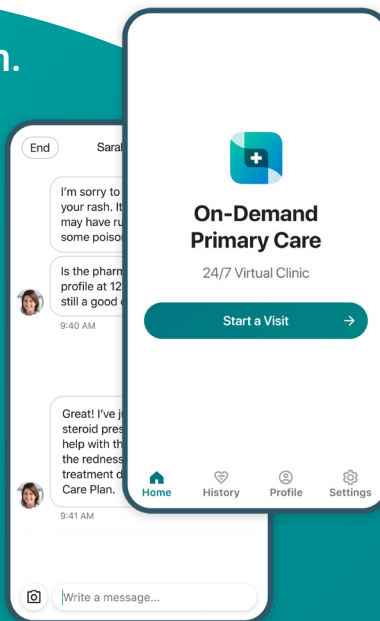

On their terms

24/7 diagnosis and treatment

Unlimited and affordable

Low to no cost for employees and dependents*

Caring for employees in the healthcare industry

of our clients are in the healthcare industry

of employees from the healthcare industry would use 98point6 again

of employees would have gone to urgent care if they didn't have access to 98point6

of healthcare employees come into our clinic after traditional office hours

"This visit using this app has been a game changer.

I work 12-hour night shifts and getting into the doctor can be difficult so I usually try and nurse things along and it can take its toll. Working in the ER, I don't want to go for minor issues and just limp along allowing things to get worse before they get better. I am so appreciative for access to a provider with such accessibility and ease."
